

## Projetex 7 Build 7001 Release Notes:

- Account-based management of Projects and Client: Account Managers now are assigned Accounts instead of Clients. A Client can be a single account (as before) or multiple accounts, with a number of Projects and Account Managers assigned to them.
- Custom fields in Jobs and Quotes for even more database customization.  
Mass action: quick generation of multiple Invoices, Purchase Orders and Payments.
- Improved file manager: additional options to further enhance work files management: now with a few clicks all relevant folders (for example all Job Assignment and Purchase Order folders for a given project) can now be opened in the second field of Files tab.
- File management options in Edit job windows.
- Built-in FTP client available directly on Files tab for quick access to Clients and Experts FTP folders.
- AnyCount 6.0: Projetex 7.0 now features built-in bestselling AnyCount 6.0 text count engine. Numbers in AnyCount notes are now aligned into distinct columns.
- New version of reporting engine: Projetex 7.0 now features built-in latest FastReport 4.2 report compiling engine.
- Wizards function introduced: New Client, Contact, Account, Service, Quote, Invoice and PO can now be created from any window of Projetex Workstation.
- Freelancer search option is now available in Freelancers window.
- Invoicing policy settings can be configured in the client's profile, allowing you to track if a client job is ready for invoicing or not.
- Last accessed folder on the Files tab is now remembered.
- All unfinished jobs can be automatically closed when closing the project.
- Phantom payment notes can now be added.
- An Expert can now be assigned directly from Job Dialog window.
- Info notes can be now broken down by types.
- Apply button in all "edit" windows allows to immediately enter changes to the database without closing and re-opening the window.
- Job status filters available in schedules.
- CATCount can now process Logoport logs in addition to Trados logs.
- Additional Project and Job statuses - "On Hold" and "Planned".
- Easy Project deletion, enabling all project jobs to be quickly deleted along with the project.
- Contact Photos picture size has been increased to 110x120 pixels.
- Active Server connections can now be displayed in Projetex 7.0 Server Administrator.
- List of online users can now be viewed from Projetex 7.0 Server and in Projetex 7.0 Workstation.
- Faster database server - data exchange rate between Server and Workstation has been improved.
- Localization support – Projetex's User Interface can now be easily localized into your language.
