

## VDU/Display Screen Assessments of Workstations

**Our qualified consultants will visit your premises and conduct a Display Risk Assessment in accordance with the Health & Safety (Display Screen Equipment) Regulations 1992 and The Management of Health & Safety at Work Regulations (1999).**

Your own organisation's risk assessment documentation can be used, or alternatively we can provide DSE risk assessment forms.

**Location:** On-Site at your premises

**Duration:** Approx 3 Hrs (depends on the number of offices & workstations to be risk assessed)  
30 Minutes per Workstation (approx)

**On completion of the DSE Risk Assessment, you will be provided with a comprehensive Written Report ( this is included in the audit cost).**

### The Report will include the following:

- The potential risks to health from using DSE
- Report findings on the three main risk areas:
  - Postural problems
  - Visual problems
  - Fatigue
- Analysis of workstation areas
- Reducing risks
- Analysis of assessments carried out
- Action plans
- Compliance with current legislation

**A written Proposal is provided, based on the total number of workstations to be assessed. Where workstations are based at different office locations, a small charge will be made for travel and time expenses between office locations.**
