

How to carry out Display Screen Assessments

This course is designed to provide key staff with the information and skills to conduct effective Display Screen Equipment assessments, conforming to the requirements of the Health and Safety (Display Screen Equipment) Regulations 1992.

Who should attend?

Anyone with the necessary qualities to become an assessor, or those who are responsible for carrying out Display Screen Equipment Risk Assessments.

Course Objectives

This half day course has been designed to make sure you have a person within your organisation who is competent to carry out a Display Screen Equipment Assessment. As part of the course, delegates will carry out a practical DSE Assessment at a workstation.

- Course Location:** On-Site at your premises
- Course Duration:** One Half Day, 3 Hrs (times & date to suit you)
- No. of Delegates:** 10 delegates max

Course Content:

- An overview of the legal requirements for Risk Assessment
- Health risks associated with Visual Display Units (VDU's)
- Introduction to Ergonomics
- The Health and Safety (Display Screen Equipment) Regulations 1992 - the main requirements
- British Standards for VDU's and Environment
- Carrying out and recording DSE Assessments
- Practice at conducting practical workplace assessments

Delegates Receive:

Display Screen Equipment Risk Assessors Certificate and course notes.
